Other Scholarly Activities

2017 – 2025:

Evaluation Research and Advisory Committee (ERAC) for National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA) – Chair (2022-2025) and Member (2017-2022)

- The ERAC was established in 2017 to assist the NBCRNA in project development and study design, data analysis, and identification and pursuit of transformative outcomes in research that align with the NBCRNA's mission and strategic priorities.
- In 2022, the ERAC worked with NBCRNA research staff to co-create a research agenda using a Delphi method. That research agenda, to be fully executed by 2026, includes the following research questions: 1) Do any of the NBCRNA credentialing programs exhibit bias against any groups (e.g., age, gender, race/ethnicity, and native language? 2) Is the Self-Evaluation Exam (SEE) providing nurse anesthesia educational program faculty useful information or are additional enhancements needed? 3) Is certificant performance comparable on CPCA and CPCA-LA; are there significant differences in perceptions amongst CRNA participants who complete either modality as well as their perceptions on the feasibility and acceptability of CAPCA-LA? 4) What changes, if any, are needed to the CPC program? 5) What has been the impact (on certificants and patients) of the NSPM-C since its inception?
- 4 publications.
